

Dear all,

There will be a number of very interesting ultrasound based presentations in our department. As the ultrasound is almost a fixed part of everyday life of many specialities, these presentations will be suitable for most of specialities in a district hospital. All Trainees, Medical students, non-Consultants and Consultants are welcome to attend these lectures. For the Trainees outside of our Trust attending the lecture or hands on training there will be one CPD point for each session awarded.

Depending on the number of attendees we will organise the location for presentations but up to 15 can be accommodated in our anaesthetics seminar room. An advance registration is important to select the appropriate venue. **The registration list will be with my secretary, Isabel, isabel.lewis@walsallhealthcare.nhs.uk or extension 7388 (01922 721172 and then the extension 7388 for external calls)**

The lectures will start at 12.30 hrs on Fridays as listed below. These will last for at least an hour and will be awarded with 1 internal CPD point. There will be a certificate to take home at the end of each presentation.

After a few lectures, hands on training will be organised to practice the acquired knowledge. **These will be on Friday afternoon.**

An advanced registration for the practical sessions will be strictly necessary as unfortunately the places are very limited (7-10 only). These places will be offered first to the colleagues who have attended the theoretical part. Each session is certified with 1 CPD point.

Title	Date	Time
Training pathways in Ultrasound	06th November 2015 (Room 5)	13.00 - 14.00
Basic Physics of Ultrasound 1	13th November 2015 (Room 13)	13.00 - 14.00
Basic Physics of Ultrasound 2	27th November 2015 (Room 10)	13.00 - 14.00
Needle Visualisation with US	11th December 2015 (Room 10)	12.30 - 13.30
ECHO Basic Views	18th December 2015 (Room 12)	12.30 – 13.30
FAST Exam approach	15th January 2016 (Room 11)	12.30 – 13.30
Lung Ultrasound	22nd January 2016 (Room 11)	12.30 – 13.30

Hands on Training	Date	
Needle Visualisation with US	11th December 2015 (Clinical Skills 14)	13.45 – 15.00
ECHO Basic Views	18th December 2015 (Clinical skills 14)	13.45 – 15.00
FAST Exam approach	15th January 2016 (clinical skills 14)	13.45 – 15.00
Lung Ultrasound	22nd January 2016 (Clinical skills 14)	13.45 – 15.00
